- The program provides preferential capital gains treatment for investments within designated low-income census tracts

- The second benefit is a 10 percent step-up in basis for capital gains reinvested in a QOF if the investment is held for five years
- The basis is increased an additional 5 percent for any investments held for seven years
- This step-up in basis means taxpayers can exclude up to 15 percent of the value of their reinvested capital gains from their taxable income
- Finally, QOF investors can permanently exclude from taxation any capital gains that accrue after their investment in a QOF, if the investment is held for at least 10 years
